

Putting IEEE TISP-Canada on the map

TISP brings together IEEE members with their engineering expertise from industry and academia with local elementary and secondary school teachers. The main goal is to provide teachers with additional science and technology background knowledge, materials and support.

IEEE Canada constitutes Region 7 of IEEE with many active Sections, as displayed on the map above. Since 2009, the IEEE Teacher In-Service Program of Region 7, TIPS-Canada, has initiated

activities across the country, and many Sections are promoting TISP. Volunteers are encouraged to contact the Region 7 Sections directly through www.ieee.ca or contact the national TISP-Canada Committee Chair, Dr. Anis Haque, at anis@ucalgary.ca. Further information is available at www.tisp.ieee.ca.
